Are you shaping the future?

Enlit Africa is the place for you

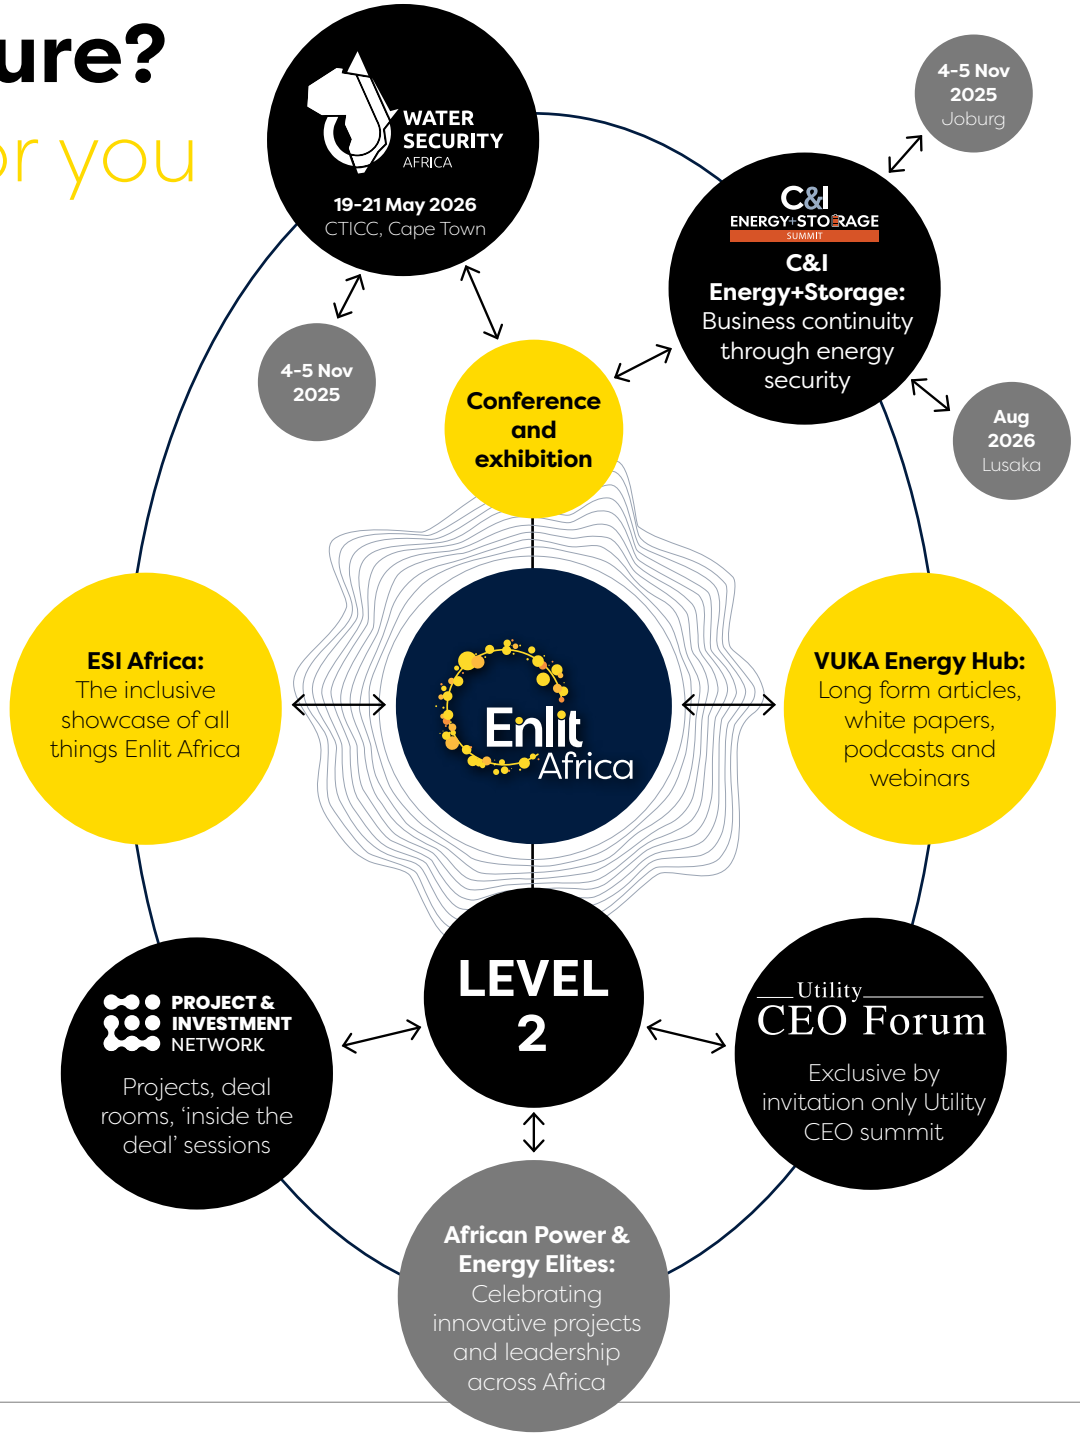

Enlit Africa is the go-to platform for Africa's power, energy and water sectors — where deals get done, ideas spark and partnerships form to tackle the continent's biggest challenges.

Every element of the Enlit Africa ecosphere – from the power sector content to the Project & Investment Network - is designed to show the integrated and increasingly multisectoral elements of the energy transition and investment landscapes.

Over three information and networking-packed days, you'll dive into the energy transition, supply security, cutting-edge tech and fresh opportunities across Africa. Held annually in Cape Town, Enlit Africa is the perfect spot to connect Africa to the world.

But it's not just talks and expo booths: We deliver targeted networking, from CEO Forums to site visits, helping everyone—from engineers to executives—find investments, collaborators and solutions that drive real impact.
